|--------------------|------------------|
| Pre-open Session | 0900-1000 hours |
| Open | 1000 hours |
| Continuous Session | 1000- 1500 hours |
| Close | 1500 hours |
| Post-close | 1500-1530 hours |
| Suspend | 1600 hours |

The extension is meant to increase access to the market by investors, improve market liquidity and deepen the markets. The extension will however result in changes to the delivery time of market data reports, which are normally circulated within an hour from the post close.
